EMIRATES GROUP · EMPLOYEE JOURNEY COMPANION

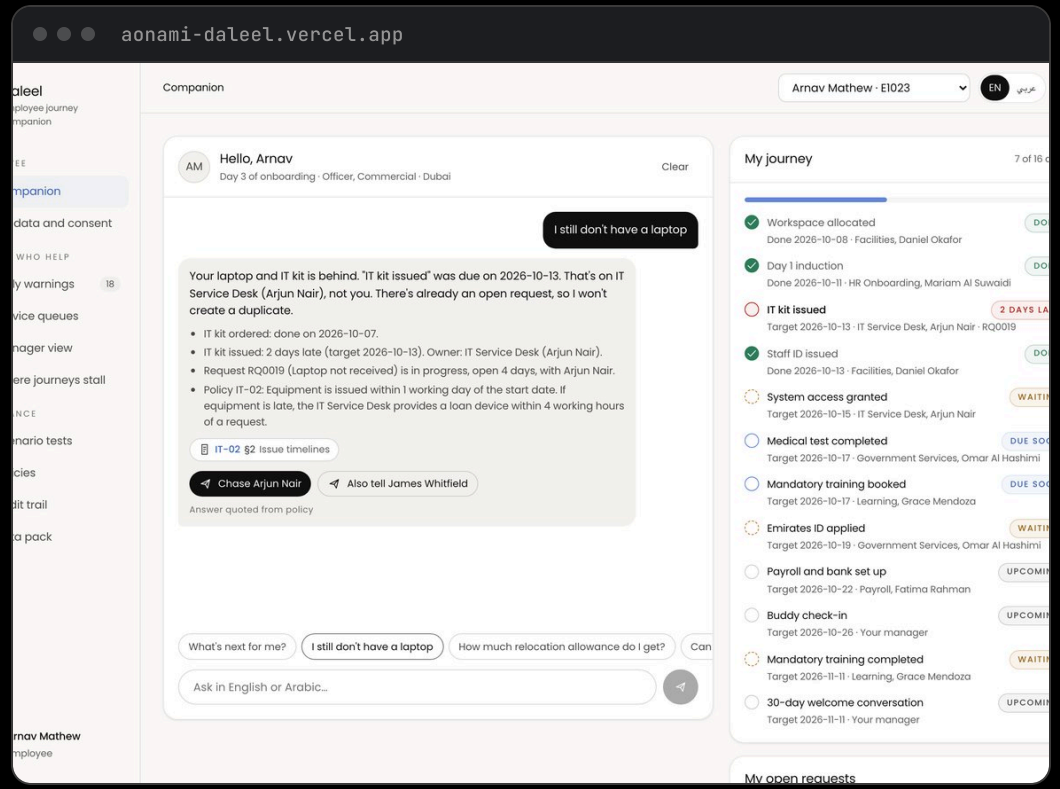

Daleel

Knows where you are in your journey,
and who can help.

LIVE PROTOTYPE

aonami-daleel.vercel.app

Press Guided demo. Runs on synthetic sample data.

Joiners and movers get stuck between teams.

Onboarding and internal moves touch HR, IT, facilities, learning and government services. The signals that someone is stuck already exist, scattered across systems, and surface only as a complaint.

STRONGLY AGREE ONBOARDING IS GREAT

12%

of employees, Gallup. [1]

TEAMS IN ONE JOURNEY

5

HR, IT, facilities, learning and government services.

FRICTION FLAGS NAMING THE RIGHT TEAM

56/56

on our synthetic pack.

AT EMIRATES' SCALE

The Emirates Group workforce grew 8% to 130,919 people in 2025-26, with more than 4,000 UAE nationals. [5]

HOW THE CHALLENGE IS JUDGED

JUDGING CRITERION	WEIGHT
Scenario performance	30%
Employee experience	25%
Responsible AI and privacy	25%
Deployability and reuse	10%
Team and pilot readiness	10%

Source: challenge brief [2]

One journey per employee, joined from every team.

Daleel compares each employee's journey with the expected steps and target times, then answers, acts and escalates for them. No cloud AI: intent, status and routing are deterministic, and every policy answer quotes a published section.

1 Journey
Events matched to the journey map, with owner and target date.

2 Ask
English or Arabic; intent and topic by rules, not a model.

3 Answer
Status from the journey; policy quoted with its section.

4 Act
Complete request, chase or booking, to the owning team.

5 Spot
Late steps, slow requests, opt-in pulse, repeat contact.

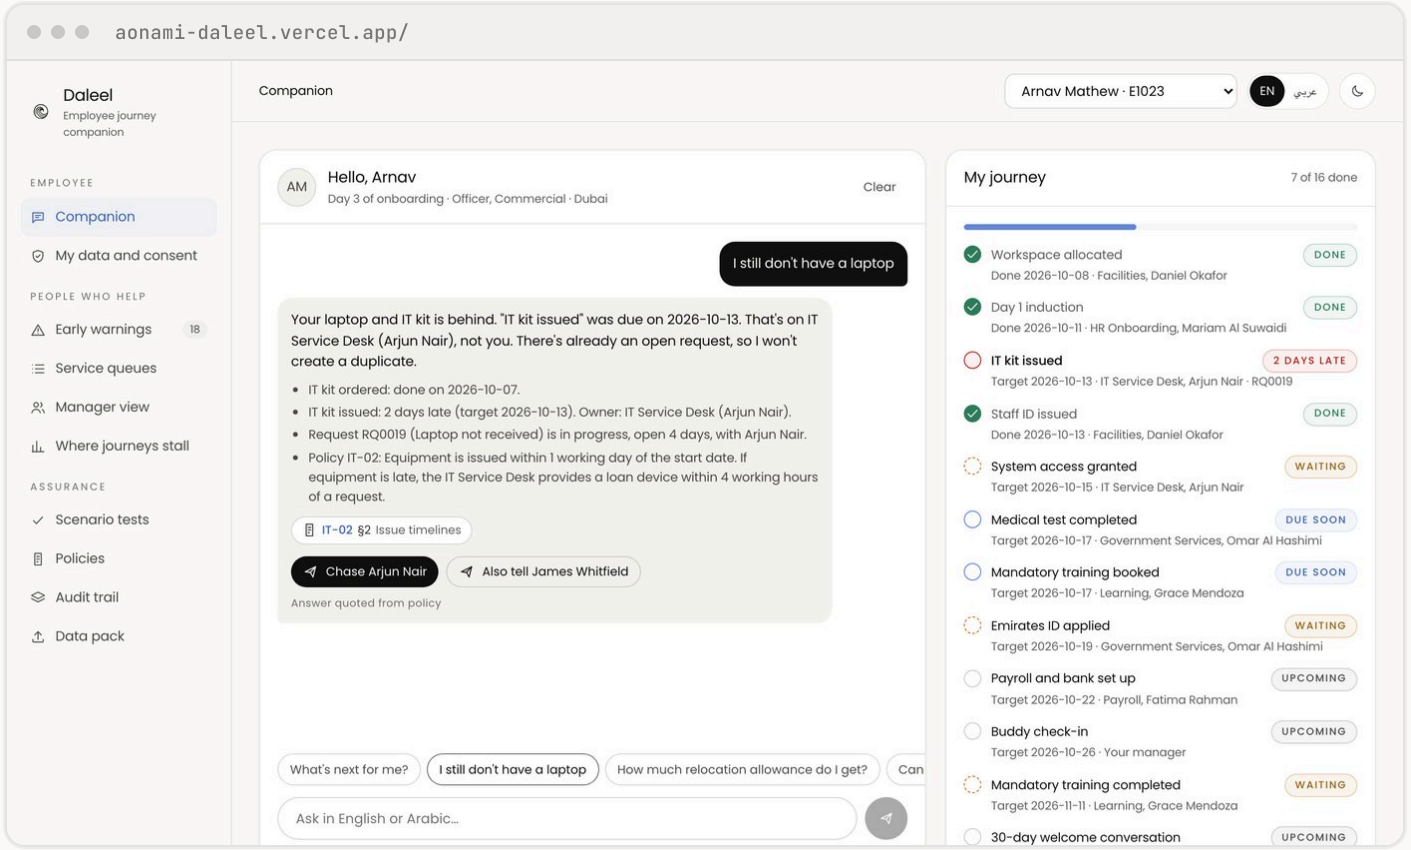

6 Escalate
A named person, with a summary the employee has seen.

- **Says when it is not sure**, and hands off rather than guessing.
- **Safety concerns go straight to a person**, in confidence.
- **Works for the employee**; it is not a monitoring tool.

AI WHERE IT HELPS

Intent, status and routing are rules, so every answer is traceable. Optional: an on-premise language model can be added to understand unusual phrasing, intent only, behind the same guardrails. It never writes a policy answer or decides an escalation.

“I still don’t have a laptop.” Day 3, answered in one reply.

The owner, named

IT kit is two days late with the IT Service Desk, not with the employee.

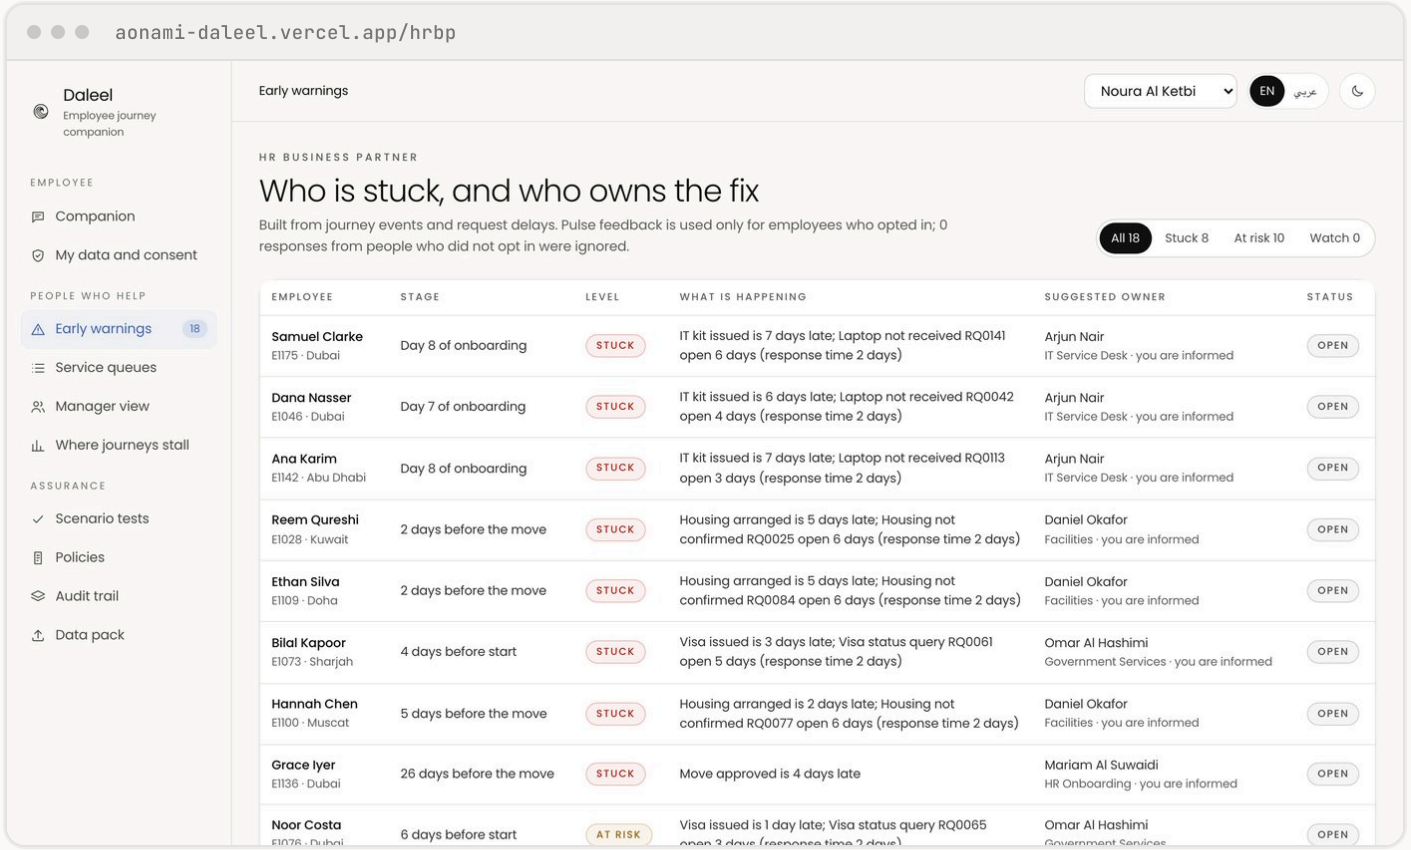

No duplicates

An open request already exists, so Daleel chases it rather than creating another.

Policy quoted

IT-02: a loan device within 4 working hours of a request.

Who is stuck, and who owns the fix.

Ranked early warnings

Watch, at risk, stuck, from journey events and request delays.

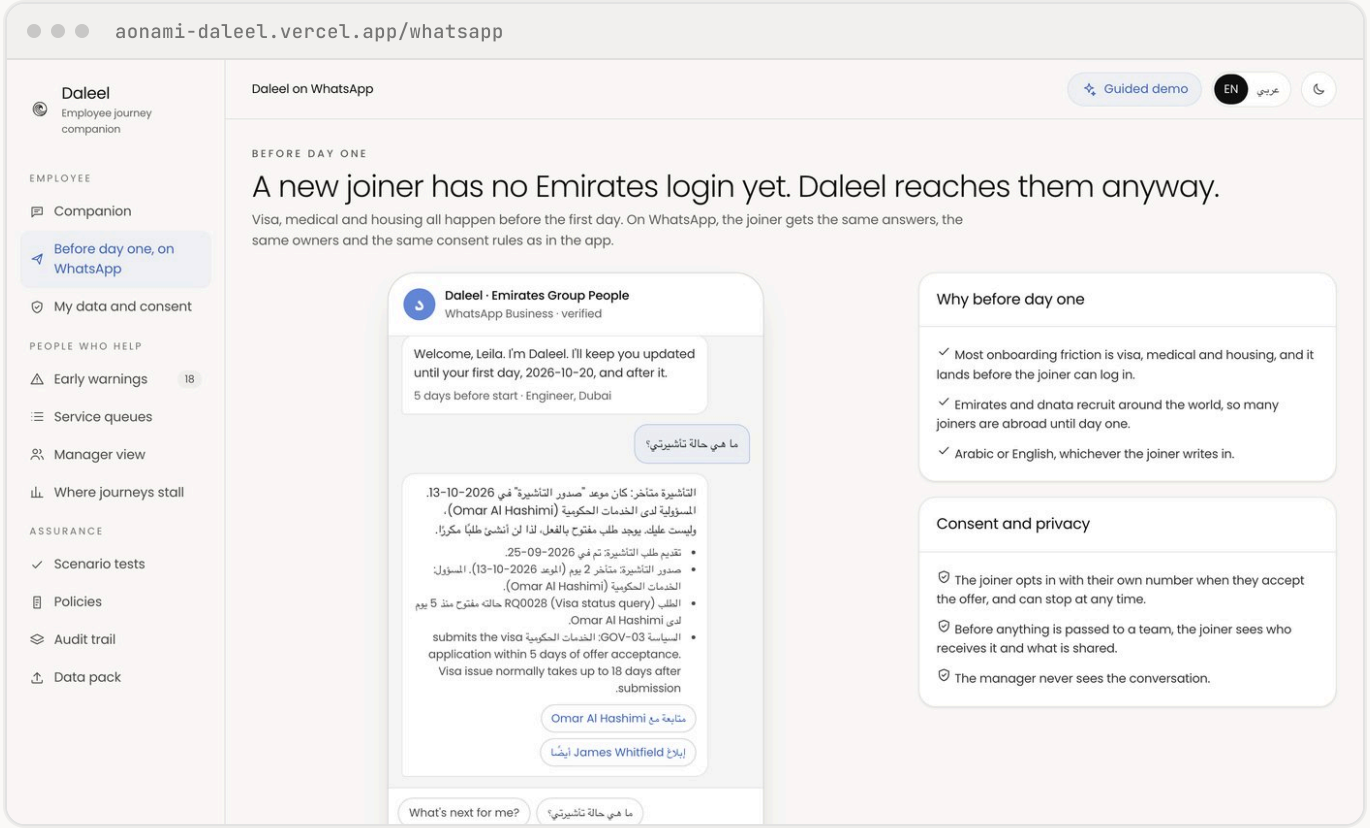

Root-cause owner

Usually the team that can fix it, with the evidence.

Pulse only with consent

Feedback counts only for employees who opted in.

Daleel before day one: a new joiner has no Emirates login yet, so Daleel reaches them on WhatsApp.

- **Visa, medical and housing happen before day one**, when the joiner cannot log in to anything.
- **Same engine, same owners, same consent rules** as the in-app companion; Arabic or English.
- The joiner opts in with their own number at offer acceptance. **The manager never sees the conversation.**

WHY IT MATTERS

Emirates and dnata recruit around the world, so many joiners are abroad until day one. The friction that turns into early regret starts before the first login. [5]

Scenarios judges can run live, on any pack.

Our own pack in the brief's shape: 200 employees, about 1,500 journey events, service requests, opt-in pulse, 12 policies and both journey maps, with 56 planted friction cases and 15 near misses that must not be flagged.

LIMITS WE DISCLOSE

Results are on our synthetic benchmark. Unseen phrasings scored 15 of 24 before fixes. Arabic text needs native review; policy answers are only as current as the policy library.

WHAT WE EXPECT ON REAL DATA

Real employees will phrase things we have not seen: on our own first pass, 15 of 24 new phrasings matched. When Daleel is not sure it says so and hands off to a person, so a miss becomes a handoff, not a wrong answer. New phrasings are added weekly in the pilot.

BENCHMARK ON OUR OWN SYNTHETIC PACK	RESULT
Hidden-scenario style tests (22, incl. Arabic)	22 of 22
Unseen phrasings (24)	15 first pass; 24 after fixes
Friction detection, four packs	100% precision, 100% recall
Flags naming the right step and team	56 of 56
Renamed columns, DD/MM/YYYY	Identical results

Our own synthetic packs. The tests re-run on the official pack when it is loaded.

Requests arrive complete, so service owners never ask again.

IT-02 §2 | IT SERVICE DESK | DAY 3

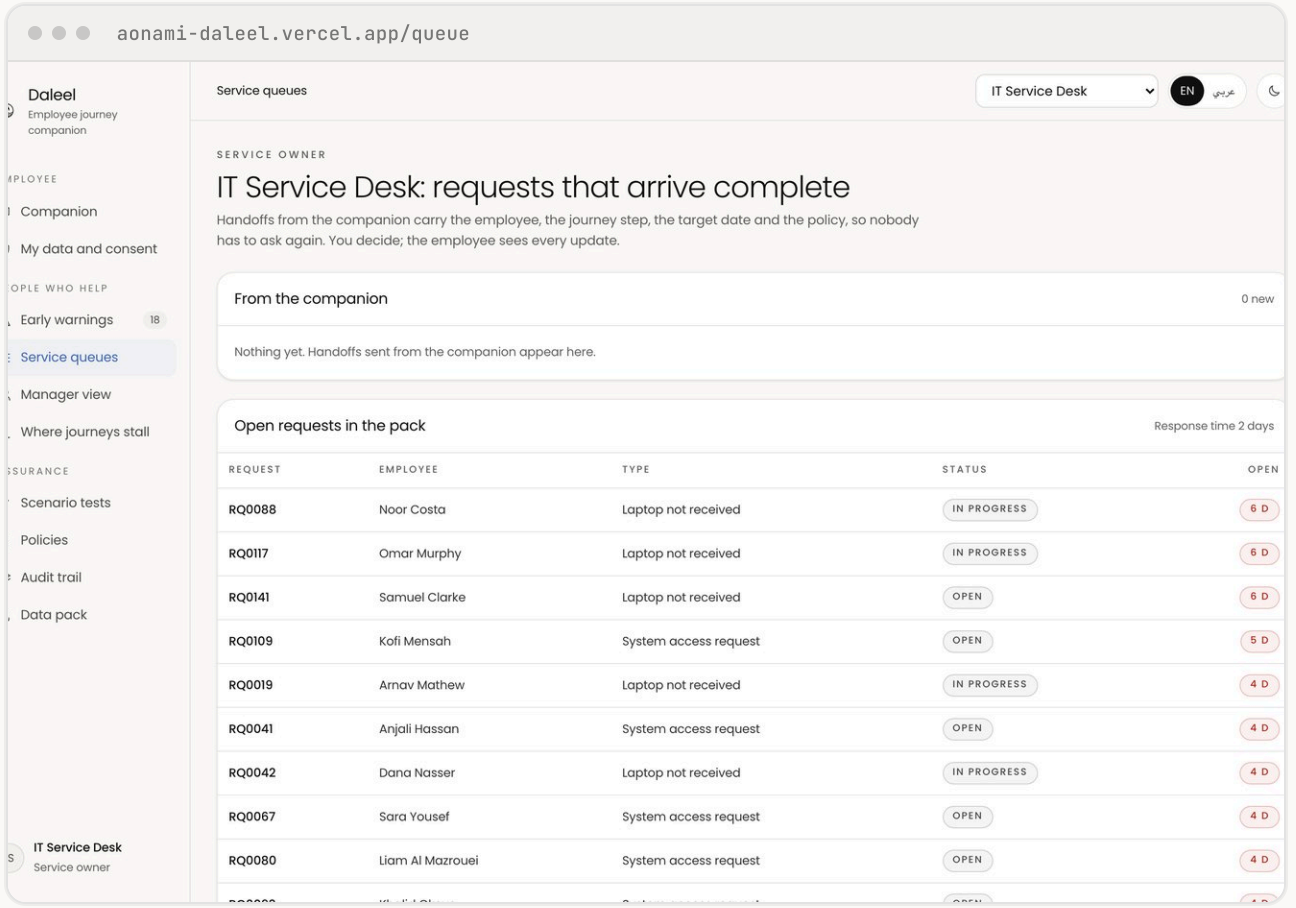

“I still don’t have a laptop”

Your laptop and IT kit is behind. “IT kit issued” was due on 13 Oct. That’s on IT Service Desk (Arjun Nair), not you. There’s already an open request, so I won’t create a duplicate.

`employee=E1023 · step=IT kit issued · target=2026-10-13 · request=RQ0019`

Actions: chase Arjun Nair; also tell your HR partner.

- Before anything is sent, the employee sees who receives it and what is shared.
- Routine actions run through team agents: the learning agent books training.

Daleel works for the employee. It is not a monitoring tool.

OPT-IN PULSE

Used only while consent is on; switch off or delete at any time.

EVERYTHING HELD, VISIBLE

Profile, events, requests, signals shared and handoffs, with one-click download.

MANAGERS SEE TASKS ONLY

Never conversations, pulse feedback, comments or early-warning levels.

A NAMED PERSON OWNS EVERY INTERVENTION

The employee sees who receives what before anything is sent.

NO PERFORMANCE USE

Declines performance, probation and disciplinary questions; excluded by policy and design.

NO CLOUD AI

Deterministic engine; data stays in Emirates' environment.

Designed for the UAE Personal Data Protection Law [3] and the principles of the UAE Charter for the Development and Use of AI [4].

Policies, journey maps and owners are data. Another entity loads its own.

1 Source systems

Read-only feeds from HR, IT, facilities, learning and government services.

2 Daleel

Static web app in a container, private cloud or on premises. No outbound connection.

3 Single sign-on

Employee, HR partner, service owner, manager, auditor.

4 Team tools

Handoffs go to the ticketing or case tool each team already uses.

	HOW
Policies	From the policy library; every answer cites a section.
Journey maps	Steps, owners and target times are files, not code.
Columns	Matched by meaning; renamed columns and other date formats load unchanged.
Languages	English and Arabic, right to left.

Eight weeks, one cohort, shadow mode first.

WEEKS	WHAT HAPPENS
1 to 2	Load journey maps, owners and policies; agree targets and response times
3 to 4	Shadow mode on one cohort; compare early warnings with real escalations
5 to 8	Live with opt-in employees in one location; weekly review with HR partners
End	Time to resolve, escalations avoided, employee feedback; go or no-go

WHAT WE NEED FROM EMIRATES

- Journey maps, owners and the policy library
- Read-only feeds from HR, the IT service desk and facilities
- One onboarding cohort and its HR business partner
- WhatsApp Business approval, if pre-day-one contact is in scope

WHAT WE MEASURE

- Time to resolve a stuck step
- Escalations avoided
- Requests that arrive complete
- Employee feedback, opt-in only

THE DECISION AT THE END

Go or no-go, on numbers agreed with Emirates before the pilot starts.

Every judging criterion, and where it is answered.

CRITERION	WEIGHT	SLIDES	STRONGEST EVIDENCE
Scenario performance	30%	7	22 of 22 hidden-scenario style tests; friction 100% precision and recall
Employee experience	25%	4, 5, 6, 8	Reaches joiners before day one, on WhatsApp, in Arabic or English; One place to ask; plain answers with the owner and what happens next; Arabic
Responsible AI and privacy	25%	9	Opt-in pulse; employee sees everything held; managers never see conversations
Deployability and reuse	10%	10	Policies and journey maps are data; no cloud AI; container on premises
Team and pilot readiness	10%	11, 13	8-week pilot with one cohort, shadow mode first

IN ONE LINE

One place to ask, answers with their source, and a named person for anything that affects you.

TRY IT LIVE

aonami-daleel.vercel.app

Press Guided demo. Runs on our synthetic data.

Production AI with evaluation, privacy-first data systems and HR-grade workflows.

JR Jayesh Kumar Rout

CO-FOUNDER, STRATEGY AND PRODUCT

IDfy: KYC and compliance, 60M+ verifications a month

OneCard: onboarding reporting engine for 6 banks

ON THIS BUILD

Owns the pilot plan and the relationship.

PK Pratik Kumar

CO-FOUNDER, PRODUCT AND GO-TO-MARKET

Stashfin: product manager, credit-report vertical

Aonami: designed the agent approval model in Bridge

ON THIS BUILD

Product flow and the demo; records the video.

BM Bhavik Munot

FOUNDING ENGINEER, PLATFORM AND DATA

Amazon: compliance-critical logs across 6,000+ AWS accounts

Electronic Arts: real-time pipelines up to 100K TPS

ON THIS BUILD

Data loading, matching and the command-line runner.

PJ Piyush Jha

FOUNDING ENGINEER, BACKEND AND INFRASTRUCTURE

Ideaflow, Menlo Park: founding engineer, prototype to production

Trell: APIs serving millions of daily users

ON THIS BUILD

Container deployment, single sign-on and connectors.

HA Harshil Agrawal

ML ENGINEER, EVALUATION AND MLOPS

Nielsen: multi-agent pipeline; 65% less manual analyst time

Monthly retraining and deployment for 50 clients, no manual steps

ON THIS BUILD

Benchmarks: the answer key, precision and recall.

Aonami builds AI agents and decision systems for regulated institutions, with a named person approving every action. Team of 9 across engineering, AI and delivery.
